Estimated time allowance: 40 hours

Annotation:

The CHIC project concerns shaping and transferring the cultural heritage of Europe, its multicultural image, transnational character, which are the basis for shaping the sense of social and cultural unity of Europeans and for strengthening European identity and active citizenship; the presence of a European cultural heritage in selected partner cities. The city is understood as a tool for finding a cultural community between the national heritage of partner countries and the cultural heritage of Europe. This is particularly important in the period of intensified migration and the phenomenon of cultural transformation, where the boundaries of national cultures are blurred and create multiple identities. It is equally important for native Europeans to understand the cultural community of nations and minority and majority societies that make up Europe. Upon successful completion, students will receive a certificate of participation in the workshop.

Required number of participants: 5 – 10 people (students, PhD Candidates, tutors, teachers, etc.) *Participation in the workshop is conditioned by registration - form of registration: by agreement.*
